

I want to go home

Anonymous Developer

August 16, 2020

Let I be me, W be the objects of my willingness, and H be home. Now we can suggest a map M , which carries its domain onto the image representing home. Since I want to go home, it is obvious that

$$I \in W \text{ s.t. } M(x) \in H \forall x \in W$$

So let me go home.
